

C10

High-Performance
Folded Motion
**Center Channel
Speaker**

The ideal compact Center Channel option to deliver crystal clear dialogue perfectly complimenting your Motion home theater system..

For the next generation of our Motion Series, we wanted to do something extraordinary. Tired of the "status quo," we went back to the drawing board, tasked with reinventing the legend of Motion Series. We came up with all-new audio technologies, a bold design, and modern finish options. We changed everything, leaving nothing on the table, to bring you our best Motion Series ever.

The ideal compact Center Channel option to deliver crystal clear dialogue perfectly complimenting your Motion home theater system. The angled flippable cabinet design of Motion C10 allows the option to angle the speaker upwards towards the listener when it is mounted on a lower shelf, helping to improve dialogue clarity. Performance and practicality were top concerns for Motion C10, so its relatively compact size makes it compatible with more furniture options than larger designs.

C10

Application
Center Channel

Frequency Response
63 Hz - 25 kHz

Dispersion
90° (vertical) x 90° (horizontal)

Sensitivity
93 dB

Impedance
4 ohms

Crossover Frequency
1000 Hz, 2000 Hz (2.5-way)

High Frequency Driver
1" x 1.4" (2.6cm x 3.6cm) Gen2 Obsidian Folded Motion® Tweeter with 9.2 in² (59.4 cm²) diaphragm

Mid Frequency Driver
2x 5.5" (14cm) Woven Fiberglass cones with cast polymer baskets. Non-resonant asymmetrical chamber format. Unibody cone construction. Anti-lobing 2.5-way crossover design.

Low Frequency Drivers
N/A

Cabinet
Rear Ported

Recommended Amp Power
20 - 200 watts

Binding Post Inputs
Custom 5-way binding posts

Weight
23.5lbs / 10.7kg

Dimensions (HxWxD)*
7-1/4" x 19" x 11-1/2"
18.4cm x 48.3cm x 29.3cm

Finish
Gloss Black, Walnut, and Satin White

**Product dimensions include feet, binding posts, and grilles.*

Specifications are subject to change without notice.

Controlled Dispersion

Any time your speaker reflects sound off of a surface in your room, it changes the sound in some way. One of the most harmful changes that occurs is the result of the first reflection point, or the first point at which sound begins to bounce off the walls or other surfaces in the room. Controlled Dispersion minimizes these sound degrading early reflections by controlling the spread of sound from the tweeter into the room, enhancing your listening experience with greater clarity, and expanding placement options in any room.

Gen2 Obsidian Folded Motion Tweeter

Our signature thin-film tweeter technology just got better. With an upgraded motor structure, the latest Gen2 FMT provides higher output and lower distortion than ever before.

Folded Motion Waveguide

After an extensive evaluation of nearly 50 design options, the Folded Motion Waveguide profile was meticulously chosen to harmoniously align with the dispersion of the midrange drivers, resulting in enhanced output. The waveguide guarantees consistent sound quality regardless of the listener's position and minimizes unwanted room reflections. Proper waveguide design is crucial as it helps control the sound's dispersion pattern, ensuring that the sound is evenly distributed across the listening area, resulting in optimal sound quality.

Woven Fiberglass Mid-bass

The lightweight and robust Woven Fiberglass mid-bass in the C10 is perfectly suited for keeping pace with Motion's Gen2 FMT, providing crystal clear dialogue, vocals, and lifelike instrumentals. Perfectly pairs with Motion CI products to easily create customized solutions.

Flippable Center Channel Cabinet

The unique flippable design of the C10 allows for better sound clarity and immersion when placed on a lower shelf or piece of furniture by directing the sound upwards towards the listener's ears.

Secure-Lock Grilles

Besides looking modern and elegant, our new Secure Lock grille design uses clever, stealth mounting tabs to securely hold the grilles in place while also allowing you to customize the appearance of your speaker. Instantly create a unique look to suit your preference at any time by choosing which grilles to leave on or off, or even rotating the grilles to display the grain of the fabric how you prefer.

McCracken-Vojtko Crossover

Named after our acoustic engineers, this new custom crossover perfectly melds the bespoke driver platforms. Carefully designed using proprietary measurement and simulation software, and fine-tuned and evaluated using double-blind listening tests, the McCracken-Vojtko crossover is the maestro that weaves all the elements into a cohesive whole.
